maximum flexibility
to meet the needs of
professionals around
the globe.**

FS400 ASIC TRUESCALE™ DIGITAL VIDEO PROCESSING

By utilizing FOCUS Enhancements' proprietary FS400 ASIC TrueScale™ digital video processor, TView Gold will convert computer resolutions from VGA (640 x 480) to UXGA (1600 x 1280) and perfectly display these on your monitor, television, or projector. Only TView Gold uses screen sizing and screen positioning capabilities to fit images precisely onto any television without dropping lines or sacrificing picture clarity.

THE PERFECT PRESENTATION

The TView Gold also offers special features for presentations including, spotlight, highlight, zoom, pointer, pointer zoom, area zoom, and image freeze capabilities. All are accessible from the IR remote control. Move a spotlight, highlight, or pointer to any location on the television screen and zoom in to keep your audience involved.

IT'S ALL ABOUT YOUR IMAGE

The video output from TView Gold can be positioned and sized, both horizontally and vertically to perfectly fit the screen. Brightness, sharpness, and contrast controls allow the image to be adjusted to look its best on any television. Exclusive flicker filters stabilize the video image so your moving video, slide presentations, spreadsheet, and other computer applications look their best.

CONVENIENCE TO GO

TView Gold supports any Macintosh and Windows computer with a standard VGA-type output. Connection and configuration is easy and the front panel status indicators, remote control, and compact size make it the perfect companion to your laptop. Step up to the "Gold" Standard with the first choice in PC-to-TV Video Conversion.
